Education

Lewis University

Bachelor of Science in Computer Science, Minor in Cybersecurity,
Concentration in Artificial Intelligence

Removille, IL

Aug. 2023 – Dec 2026

Coursera Coursework

Meta & Google professional coursework in software development,
web technologies, and cloud fundamentals

Aug 2023 – Present

Experience

Handshake AI (Fellow Projects)

AI Training & Evaluation Research

May 2026 – Present

- Project Escher:
Prepared copyright-cleared visual datasets and designed unambiguous, single-answer question sets to improve AI visual reasoning capabilities
- Project Hydra:
Evaluated AI-generated images using structured rubrics, providing multi-dimensional ratings and detailed qualitative feedback on alignment with prompts and user intent

PitHub

React | Firebase | Serverless Architecture

Jan 2026 - Present

- Served as Scrum Master and System Architect for a 5-person Agile team, leading sprint planning and technical direction for a university content management platform
- Built a serverless React + Firebase system supporting class-based resource organization, file uploads, and real-time dashboards via Firestore listeners
- Implemented Firebase Auth (restricted domains), Cloud Storage pipelines, and CI/CD workflows using GitHub Actions across Agile sprints

LU Flight - Plane Status Tracker

React | Firebase | Serverless Architecture

Mar 2026 – Present

- Built a real-time aviation tracking platform using React and Firebase, enabling students and dispatchers to manage aircraft availability, flight logs, and dispatch workflows in a serverless architecture
- Designed core app logic with React hooks for aircraft assignment, queue management, and flight logging, integrated with Firebase Auth and Firestore for secure login and real-time data sync

KevOS

C++ | x86 Assembly | CMake | i686-elf Toolchain

Jan 2025 – Present

- Developed a 32-bit protected-mode operating system targeting the i686-elf architecture with a modular kernel design for future 64-bit support
- Implemented core OS infrastructure including GRUB bootstrapping, IDT/ISR/IRQ handling, and hardware-level VGA and keyboard drivers using x86 assembly and C++
- Built a freestanding C++ libc and low-level kernel utilities to support a Unix-like CLI environment

Technical Skills

Languages: Python, Java, C++, C, Javascript, HTML/CSS, R, Lua, x86 Assembly

Frameworks: Django, Django Rest Framework, Flask, NodeJS, ReactJS, FastAPI, TailwindCSS, Qt

Databases: MySQL, PostgreSQL, SQLite, MongoDB, Firebase Firestore

Developer Tools: Microsoft Azure, Google Cloud Services, Firebase, Git, Docker, Github Actions, VSCode, Antigravity, Insomnia, Postman, Ollama, Qt Framework
